

COUPLINGS & CLAMPS

Mining claw couplings

Mining claw couplings for claw-pattern hose and pipe connections. Select the size, material and interface for the complete connection.

Application: Application-led selection for the specified operating conditions.

Mining claw interface range

Nominal size min mm	Nominal size max mm	Connection forms	Distinct locking sizes mm
12	50	Male threaded / Female threaded / Hosetail	40 / 50

Mining claw interface range. The 40 mm and 50 mm options use a distinct positive-lock profile. Match the exact mating profile; do not assume interchangeability with European or US claw couplings. No working pressure, seal compound or temperature is established for an unspecified configuration.

Application & quotation checklist

Coupling type, size and mating half; Medium, pressure and temperature; Body material and seal compound; Hose tail, thread, flange or weld connection

Provide the part code, size, quantity, required configuration and application. Include a drawing or photograph where available.

Ratings apply only to the specified product and configuration. Confirm fluid compatibility, temperature, pressure transients, installation and complete assembly suitability. Ordering references do not establish interchangeability.
