

COUPLINGS & CLAMPS

Mining quick-fit couplings

Mining quick-fit couplings for the specified hose, pipework and operating configuration. Select the size, material and interface for the complete connection.

Application: Application-led selection for the specified operating conditions.

Mining quick-fit end-spud configurations

Nominal size min inch	Nominal size max inch	End connections	Construction options
0.5	1	Hosetail / FemaleBSP / MaleBSP	Light / Standard / Heavy

Mining quick-fit end-spud configurations. Light, standard and heavy constructions are distinct selections. No working-pressure or temperature value is inferred for this range.

Application & quotation checklist

Coupling type, size and mating half; Medium, pressure and temperature; Body material and seal compound; Hose tail, thread, flange or weld connection

Provide the part code, size, quantity, required configuration and application. Include a drawing or photograph where available.

Ratings apply only to the specified product and configuration. Confirm fluid compatibility, temperature, pressure transients, installation and complete assembly suitability. Ordering references do not establish interchangeability.
