

FILTRATION & HYDRAULIC ACCESSORIES

RECTANGULAR TANKS

Select the required connection and configuration for your application.

Ordering references: 100ltr-esm / 10ltr-esm / 18ltr-esm / 25ltr-esm / 40ltr-esm / 60ltr-esm / 80ltr-esm

RECTANGULAR TANKS exact configuration

Part code	Tank capacity l	Tank shape
10ltr-esm	10	rectangular
18ltr-esm	18	rectangular
25ltr-esm	25	rectangular
40ltr-esm	40	rectangular
60ltr-esm	60	rectangular
80ltr-esm	80	rectangular
100ltr-esm	100	rectangular

Hydraulic reservoir capacities and listed construction configurations. Capacity is the stated tank capacity, not a system oil-fill recommendation. Confirm usable volume, freeboard, mounting, dimensions, porting and fluid compatibility for the selected power pack.

Application & quotation checklist

Circuit position and required function; Flow, working pressure and temperature; Connection and installation dimensions; Filtration target or performance requirement

Provide the part code, size, quantity, required configuration and application. Include a drawing or photograph where available.

Ratings apply only to the specified product and configuration. Confirm fluid compatibility, temperature, pressure transients, installation and complete assembly suitability. Ordering references do not establish interchangeability.
