

FILTRATION & HYDRAULIC ACCESSORIES

Hydraulic Suction Strainers

Exact specified model selection; legacy and current codes remain separate.

Ordering references: SSTR-08 / SSTR-12 / SSTR-16 / SSTR-20 / SSTR-24 / SSTR-32

Hydraulic Suction Strainers exact configurations

Part code	connection designation
SSTR-08	G 1/2
SSTR-12	G 3/4
SSTR-16	G 1
SSTR-20	G 1-1/4
SSTR-24	G 1-1/2
SSTR-32	G 2

Tank-mounted suction strainer connection selections. Confirm mesh or micron size, pressure drop, oil viscosity, allowable flow and tank installation dimensions. Connection size alone does not establish suction capacity.

Hydraulic Suction Strainers exact configurations - construction & conditions

Parameter	Specification
Mounting	tank mounted

Tank-mounted suction strainer connection selections. Confirm mesh or micron size, pressure drop, oil viscosity, allowable flow and tank installation dimensions. Connection size alone does not establish suction capacity.

Application & quotation checklist

Circuit position and required function; Flow, working pressure and temperature; Connection and installation dimensions; Filtration target or performance requirement

Provide the part code, size, quantity, required configuration and application. Include a drawing or photograph where available.

Ratings apply only to the specified product and configuration. Confirm fluid compatibility, temperature, pressure transients, installation and complete assembly suitability. Ordering references do not establish interchangeability.
