

INDUSTRIAL & SPECIALIST HOSE

Self-floating dredging hose

Hose selection for the conveyed medium, pressure, temperature and installation requirements.

Application: Application-led selection for the specified operating conditions.

Self floating dredging hose

Parameter	Specification
Float material	LDPE
Accessory properties	UV protection / Impact resistance / Marine-grade galvanized fittings
Design inputs	Filled hose/pipe mass / Slurry density / HoseOD / Spacing / Required freeboard / Current/wave load

Flotation systems for dredging hose and pipe. The flotation data describes separateLDPE floats; it does not establish an integral-buoyancy hosewall construction. Select the buoyancy system for the filled line,spacing and site conditions.

Application & quotation checklist

Medium and concentration; Inside diameter and length; Pressure or vacuum and temperature; End connections and electrical requirements

Provide the part code, size, quantity, required configuration and application. Include a drawing or photograph where available.

Ratings apply only to the specified product and configuration. Confirm fluid compatibility, temperature, pressure transients, installation and complete assembly suitability. Ordering references do not establish interchangeability.
